

**WATER MANAGEMENT MASTER DEGREE PROGRAM is waiting for You  
with  
Stipendium Hungaricum Scholarship Programme in Hungary!**

Water management is an extremely increasingly complex challenge and it has policy priority facing global society. Unprecedented climate, economic, technological and demographic change require a new generation of dedicated professionals who are committed to and trained in the interdisciplinary nature of water science and management. This water management MA course develops knowledge and understanding in physical, chemical, and ecological aspects of water science in temperate, tropical and semi-arid zones. It provides a foundation in basic processes in each key subject areas, as well as interactions throughout the hydrological cycle, and the various hydrological processes and function, and the impact this has on health.

Water Management MA is also completed with professional laboratory and field exercises. Field and laboratory skills training focus on strengthening capabilities of students to conduct high quality research for dissertation and for future professional development.

The timeframe of the Water management master's training program is four semesters. Fulfillment of obligatory and optional courses, preparation of a diploma work based on free choice of subject and defending the diploma theses is required for successful completion of the program.

Water management master's diploma is suitable to enter into doctoral programs, or fulfill jobs in research, service, industry, agriculture and food industry fields connected to waters, or practice expert tasks.
